## Why Operator Training?

*Operator training is required under OSHA requirement or 1910.178 in a variety of workplace categories. But if you have an industrial accident involving an employee in any part of your warehouse, OSHA will be at your door.*

Abel Womack's OSHA-authorized instructors can help you fulfill your federally mandated operator training requirements to comply with OSHA regulations.

We have built brand new training centers in our Lawrence, MA and Wallingford, CT offices. Sessions can be held at our facilities or we can provide hands-on and on-site training programs at other locations.

## Did You Know that Most Accidents and Citations can be Avoided?

More than 85,000 violations were uncovered during the nearly 39,000 investigations conducted in 2005.

Most of the resulting citations and fines could have been avoided because the accidents instigating them were preventable.

**Sony Pictures was fined nearly \$60,000 by OSHA when unauthorized modifications to a fork lift truck resulted in an accident.**

## Why Choose Abel Womack Training Programs?

### **1. OSHA Authorized Instructors**

Our instructors are OSHA-authorized in all General Industry categories. Though they specialize in heavy equipment, they are also qualified to educate your employees in most safety related-issues affecting your warehouse.

### **2. Raymond Authorized Materials**

Abel Womack is the exclusive dealer of **RAYMOND** products in New England, Metro NYC and Long Island. We are the only dealership in most of these areas authorized to use their world-class training materials, including the award-winning "Safety on the Move" operator training program.

### **3. Top-Notch Program Delivery**

Our instructors are more than just subject matter experts; they also excel at presenting their programs in a way that is clear, engaging and compelling. They provide students with both information and motivation to be safe in the workplace.

*"I wanted to thank you for the great presentation you put on at our site this past Wednesday. I thought it was well structured and the group had nothing but good things to say about the session. I believe the training will be helpful in moving us to the next level. Thanks again for your time and efforts."*

Rich R, Director EHS&S  
Versacold Boston

## Train the Trainer Programs

In addition to our operator training programs, Abel Womack also offers programs to train the instructor of these programs. These programs are taught by our OSHA authorized instructors.

Programs we offer include:

- Forklift Training
- Aerial Lift Training
- Pedestrian Training

These sessions are designed to equip your staff with the skills and information necessary to certify equipment operators in accordance with OSHA regulations. The sessions provide an in-depth review of OSHA rules and will arm your trainers with the skills to deliver the program with clarity and confidence. An extensive training materials package is included.

*Classroom and demonstration rooms in the Lawrence, MA Headquarters Training Center.*
