

# YOUR PARTNERS IN PROTECTION

**DRIVEN BY PURPOSE:**  
Protecting Essential Employees

## COVID-19 MASKS

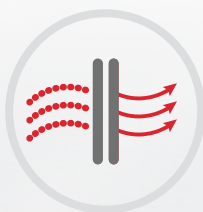

Exhibit Logistics and DeanHouston+ have shifted production, manufacturing and logistics capabilities to get the PPE needed to help America fight COVID-19.

With decades of experience in custom event displays, our team of craftsmen have acquired the supplies and engineered the processes needed to manufacture CDC-compliant face shields and masks in a safe, sanitary and private facility in Cincinnati, Ohio.

**All production, sewing and assembly is done in the USA.**

## WASHABLE FACE MASKS

### PROTECTION

Dual-barriers help prevent risk of exposure to airborne pathogens.

### FITTED BAND

Flat elastic provides flexibility in band position for comfort. Unlike disposable masks, these are designed for all-day comfort – especially suitable for shift work.

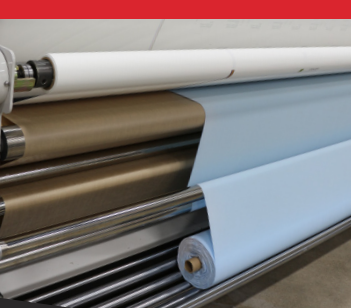

### SIZING

Sized to achieve a snug and comfortable fit for improved hygiene while maintaining a professional look. Small, Medium and Large sizes available.

### BRANDING

Printed with company-specific branding to match specifically your brand's PMS colors or any themed design. Gender and age-appropriate designs available.

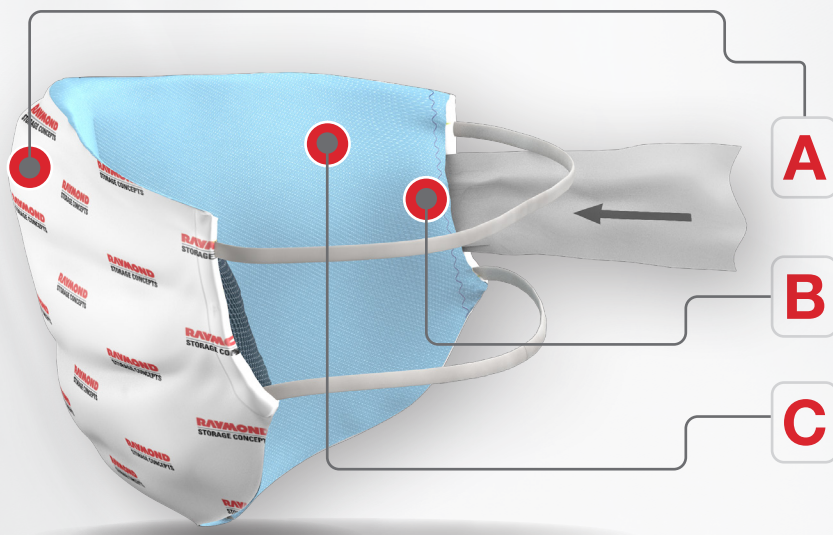

## MASK MATERIALS

**OUTER COVER:** 100% high-grade, dye-sublimated colorfast polyester for durability and low pathogen permeation potential

**FILTER POCKET:** Medical- or professional-grade disposable filter can be inserted into the inside pocket to provide added protection. Filters sold/supplied separately.

**INNER LINING:** Breathable 100% cotton for ergonomic comfort and temperature management
