

ABEL WOMACK

MORE THAN A LIFT TRUCK COMPANY

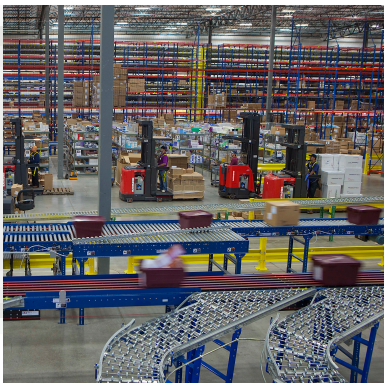

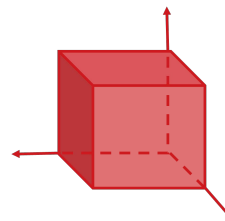

A COMPLETE SOLUTIONS PROVIDER SINCE 1922

Our material handling experts work with you to understand your challenges and operational goals. We utilize a combination of customized technologies including Raymond forklifts, fleet management, racking & storage systems, conveyor systems, picking technologies, dock & door equipment, robotics, ASRS and other automated systems to meet these goals and drive positive results.

- Design & Layout Services
- Project Management
- Installation & Integration
- Slotting Analysis
- Material Flow Evaluation
- Complete Turnkey Systems
- Parts & Components
- Maintenance & Repair Services
- Storage Accessories
- OSHA Compliance

SPACE SAVING STORAGE SOLUTIONS

We understand that space is at a premium, so our experts look to increase storage capacity and maximize utilization of a given space by considering best use for each dimension. Detailed drawings and realistic simulation capabilities allow us to thoroughly explore the best-fit solution for each facility and operation.

DESIGNED FOR OPTIMIZED FLOW

A well designed system is the foundation of an efficient facility. When strategically designed and implemented, these systems increase productivity by promoting ease of access and creating a natural flow throughout the facility.

Selective Pallet Rack

Pallet Flow

Cantilever Rack

Push Back Rack

Drive-In

Carton Flow Rack

Shelving & Movable Storage

NARROW AISLE SOLUTIONS

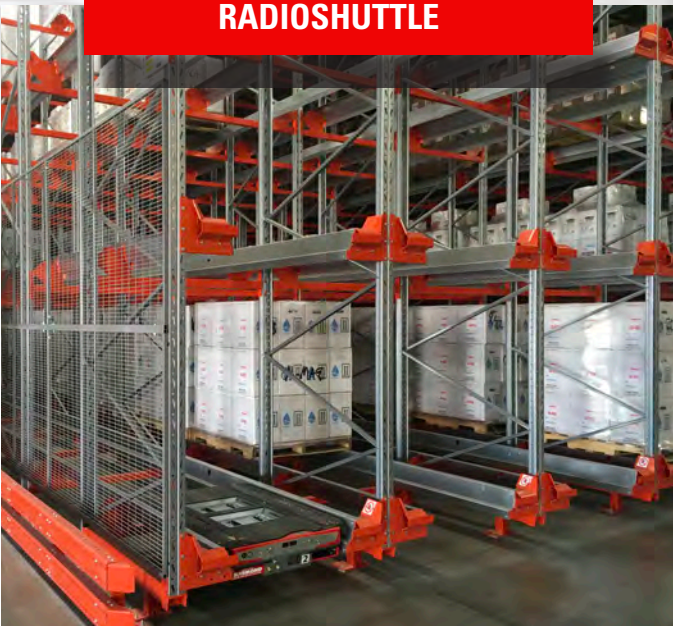

Grow vertically without expanding horizontally, Raymond's narrow aisle trucks can operate in aisles that are less than half the width required by conventional forklifts, with a greater stack height capability.

MODULAR OFFICES

Add additional office space without a high-cost renovation. Modular offices not only save space, but can save costs by only heating and air conditioning that portion of the warehouse.

RADIO SHUTTLE

This semi-automated high density storage system allows for a maximum use of warehouse space. Store more pallets deep since channels can stand more than 131 ft high.

MEZZANINES

Rather than move to a new facility, mezzanines allow you to easily add on a surprising amount of extra usable floor space for storage, work room, or for whatever other needs you may have.

YOUR PARTNER IN MATERIAL HANDLING

If you're looking for a partner to set up a warehouse with the most productive, efficient solutions in the industry, call for a free consultation. Our in-house teams of specialists has the industry knowledge and experience in all warehouse solutions.
