

# DURASOURCE BATTERY ROLLER STANDS

## PERFORMANCE EFFICIENCY AND DURABILITY

DuraSource battery roller stands are precisely engineered and constructed with a fully welded structural steel frame using oversized rollers and bearings, plus integrated bumpers and safety stops to maximize efficiency and durability.

Battery roller stands from DuraSource are available in a range of widths, depths and roll-off height sizing options to meet any facility's battery changing needs.

Simple to adjust one-inch diameter support legs allow for incremental adjustments to compensate for uneven floors while supporting heavy loads.

### Features

- Stands are finished in acid proof powder coat orange and black paint
- Available in a full range of widths
- Rubber backstops & battery safety stops
- Polyethylene covered rollers
- 1" diameter adjustable legs
- Strong rollers with 2.5" diameter steel tubes, fitted with shielded roller bearings and 11/16 hex shaft to support the heaviest workloads

**For efficient applications, a battery roller stand from DuraSource is the durable solution.**
