

AWARD WINNING

INNOVATION. QUALITY. SERVICE.

The Raymond Corporation's long history of innovation, quality and service have been part of our DNA since the beginning. George Raymond Sr. forever changed the way materials are transported by patenting the double-faced wooden pallet and hand pallet truck in 1939, ultimately establishing the material handling industry.

Throughout the years, warehousing and distribution have experienced exceptional growth with innovation remaining at the forefront of our intralogistics solutions which provide improved efficiency and productivity to our customers.

From our continuous improvement practices in our manufacturing facility to our game-changing products and solutions, we are excited to be recognized by industry, publications and global organizations for ultimately supporting our customers' ever-evolving needs while continually challenging ourselves to run better and manage smarter.
